

## Extreme Protection When Downtime is NOT an Option!

**Heavy Duty Off-Road™ Formula (HDOTR™)** is designed for off-the-road vehicles that require extra protection in extreme operating conditions. The **HDOTR™** formula was designed for use by the military, landfills, quarries, construction companies or any mission critical vehicle that travels less than **48 km/h**. The **HDOTR™** formula offers maximum protection against punctures from objects up to **12.7 mm** in diameter. It is ideal for skid steers, scrapers, graders, mining and logging vehicles. The **HDOTR™** formula conditions casings, and extends tyre life by helping tyres run cooler.

### Features

- **Reduces downtime and extends tyre life** - Prevents flats, seals multiple punctures up to **12.7 mm** in diameter, slow leaks, vent holes, bead seats and o-ring leaks.
- **Will not harm tyres and wheels** - **HDOTR™** conditions casings and contains corrosion inhibitors that help reduce scale and corrosion buildup.
- **Safe to use** - Non-flammable, non-hazardous, biodegradable.
- **Water dispersible** - Washes out with plain water leaving no residue. **Ride-On HDOTR™** - will not interfere with the application of boots, section or tyre plug and patch repairs.
- **Lowers labor costs** - **HDOTR™** helps with mounting and de-mounting of off-road, industrial, and agricultural tyres. High heat can cause a tyre to weld itself to a rim, resulting in hours of labor spent trying to break free the tyre bead and ultimately resulting in damage to the tyre and rim.
- **Suitable for all weather conditions** - Specially formulated to prevent freezing at extremely low temperatures (**-40 °C**) and separation at high temperatures (**+90 °C**).
- **Available in convenient 5-gallon pails and 55-gallon drums**

### A Reputation You Can "Ride-On"

INOVEX Industries, Inc. has earned its reputation by providing the world's most advanced tyre sealing solutions to commercial and professional fleets.
