

ROTIS™ (Ride-On Tyre Injection System) is a pneumatic drum pump designed to install **Ride-On TPS** tyre sealants into tyres without the need to deflate them. The air that's in the tyre stays in the tyre – which means the job gets done faster. Whether you are on a service call, in the yard, or working in a service bay, **ROTIS™** will save you time and money.

With **ROTIS™**, you accurately inject **Ride-On** into fully pressurized tyres (up to **7.9 Barr**), on or off your vehicles, up to **15.24 m** away from the product source. No more hand pumping. And, no more wasted time re-inflating tyres. You can remotely reset the pump for installation in multiple tyres without needing to walk back to the control panel. Controls are where you need them – at your fingertips. **ROTIS™** includes its own air line for inflating any tyre. There's no need to run separate air lines. Quality. Durability. Simplicity. Reliability. We engineered and built **ROTIS™** to handle tough jobs ... the way you want it done.

Features

Fast, accurate and efficient. Just set the meter to the desired dosage and the **ROTIS™** pump does the rest – shutting off when the desired amount is installed. Now, it's possible to install **Ride-On** into an 11R22.5 tyre at **6.9 Barr** in less than **30 seconds**. In field tests under rigorous, real-world working conditions, **ROTIS™** pumps turned more than **10 million cycles** and are still running!

ROTIS™ is supplied with everything you need:

- **15.24 m, 19 mm** steel reinforced, high-pressure product installation hose.
- **15.24 m, 9.5 mm** high-pressure industrial air hose.
- Quick-connect installation tools for dual-wheel assemblies.
- 2 valve core removal tools, dosage table and installation manual.

Specifications

- Stall-free, ice-free motor design requires absolutely no mechanical assist devices such as trip rods or push pins.
- All wetted materials (cylinder/plunger) are made of **316L stainless steel** for years of trouble-free operation.
- The pump housing is made of **304L stainless steel**.
- One year Limited Warranty (refer to Limited Warranty description for details).
- Manufactured and assembled in the USA.
Patent pending.

A Reputation You Can "Ride-On"

INOEX Industries, Inc. has earned its reputation by providing the world's most advanced tyre sealing solutions to commercial and professional fleets.
